DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. § 119(a)-(d), which papers have been placed of record in the file.

The Drawings

In order to make the drawings more readily readable the parts of the apparatus shown in block diagram form in Figs. 1 and 5 require appropriate descriptive legends. 37 CFR § 1.84(o).

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The Information Disclosure Statement

The prior art cited in the information disclosure statement filed on December 19, 2001 has been considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-17 and 23-28 are rejected under 35 U.S.C. § 102(b) as being clearly anticipated by Gontin (US 5,844,685).

Gontin discloses a flow cytometer (lines 13-22 of column 38) comprising a sheath flow cell (110, lines 10-34 of column 22) for forming a sample solution flow; a light source (131) for

Art Unit: 2877

radiating light to the sample solution flow; a detecting part (164) for detecting optical information from particles contained in the sample solution flow and converting it into electric signals; and a signal processing part (lines 53-67 of column 24, lines 1-8 of column 25, lines 50-65 of column 30) for extracting fluctuation signals from the electric signals which the detecting part outputs. A stepping motor driven syringe delivers the sheath liquid to the sheath flow cell (lines 13-31 of column 34). The information is scattered light (lines 1-26 of column 21) and can be fluorescence (lines 49-58 of column 38). The solution can be prepared using urine and the particle can be bacteria (lines 49-58 of column 38).

Allowable Subject Matter

Claims 18-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
